

Oregon

Kingsley Firing Range Annex

Facility and Location

The range is comprised of 206 acres of land used by the Air Force as a small arms firing range. The Marine Corps and later the Oregon Army National Guard controlled the land prior to Air Force usage. The Air Force later developed the land into a firing range. The land was under DoD control from 1944 until 1947 when it was transferred to the Oregon Technical Institute and then to the city of Klamath Falls for use as a park. The land reverted back to the government in 1964 when the city could not maintain the area as a park. The Air Force assumed control of the land in February 1965 for the purpose of a rifle range. The land was turned over to the Department of Interior who exceded the land and sold it to private individuals in 1976. Due to several types of usage by the military, the range was subdivided into numerous areas. Included are the areas used for small disposal operations, a small arms firing range with its firing fan, and the area where 3.5 inch rockets were fired.

Media Sampled and Findings

Drinking Water — In 2008, two of two samples detected perchlorate at 0.08 and 0.09 ppb.
Soil — In 2008, four samples reported no detection.

Appropriate Actions

Not Applicable. All samples were below the EPA and DoD Preliminary Remediation Goal of 15 ppb.
